WHY HUNGARY?

QUALITY AND DEVELOPMENT

As well as offering quality education and degrees recognized throughout Europe and beyond, Hungarian education is also open to international cooperation and research collaboration.

VALUE FOR MONEY IN THE HEART OF EUROPE

Students are attracted by the affordable cost of living with an extremely favourable cost-to-value ratio, as well as the safe and friendly living environment with convenient public transportation. The country is located in Central Europe.

NOBEL PRIZES

Hungary is also amongst one of the top countries with the highest number of scientific Nobel Prize Winners per capita, and numerous scientific inventions from Vitamin C to the Rubik's cube.

NATURE

Hungary is the land of unspoiled nature. There are ten national parks in the country, and today Hungary has eight locations on the World Heritage List.

WONDERFUL SPAS AND BATHS

Many thermal spas and baths await you in the country, where you can experience the fabulous healing effects of Hungarian thermal waters.

HUNGARIAN HIGHER EDUCATION IN A NUTSHELL

Higher education
in Hungary for more than
650 YEARS

Hungary has been a member
of the European Union since
2004, and a member of the
European Higher Education
Area (EHEA) since 1999.

➤ Three-cycle degree structure in accordance with the objectives
of the **BOLOGNA PROCESS**:

- 3** DOCTORAL [PhD / DLA] 2+2 years
- 2** MASTER'S [MSc / MA] 1-2 years
- 1** BACHELOR'S [BSc / BA] 3-4 years

+ **INTEGRATED MASTER'S
DEGREE PROGRAMMES**
[one-tier master's, OTM]
e.g. in the field of architecture,
medicine, law, teacher education, and
some agrarian and art programmes

➤ HUNGARIAN HIGHER EDUCATION IN NUMBERS (2020/2021)

64 HEIs

ca. **287,500**
students

ca. **38,000** international students
from **165** countries on more than
700 study programmes

the percentage of
international students is
13.2% (~doubled since 2013)

38 HEIs with registered
international students on foreign
language study programmes

➤ INTERNATIONAL COOPERATION IN ALL ACADEMIC FIELDS:

AGRICULTURAL SCIENCES • ART EDUCATION • ARTS • ARTS AND HUMANITIES • COMPUTER SCIENCE AND INFORMATION TECHNOLOGY •
ECONOMIC SCIENCES • ENGINEERING SCIENCES • LEGAL SCIENCES • MEDICAL AND HEALTH SCIENCES • NATURAL SCIENCES •
RELIGION AND THEOLOGY • SCIENCE OF PUBLIC ADMINISTRATION • SOCIAL SCIENCES • SPORT SCIENCES • TEACHER TRAINING

Budapest Business School (BBS) is one of Hungary's market leading and largest universities, educating more than 17,000 students. BBS has three Faculties in Budapest: Faculty of Commerce, Hospitality and Tourism; Faculty of International Management and Business; Faculty of Finance and Accountancy. Each faculty provides specialized knowledge for different fields of business, which also means significant synergies during studies. All programmes are in English with the exception of one programme which is launched in French as well (International Business Economics in English / Gestion Internationale in French).

BBS has designed its training courses to provide practical knowledge closely adapted to the demands of the labour market. As a foreign student, there are several opportunities to choose from for those who would like to study in one of the faculties of BBS, both on a bachelor's and on a master's programme.

The University offers a broad range of business-related disciplines,

social sciences programmes at BA/BSc, MA/ MSc levels and the Doctoral School of Entrepreneurship and Business. Offered by recognized business and public administration institutions, the university's internships provide excellent job opportunities.

The Budapest Business School does not only offer qualitative education to its students, it also offers several programmes and research projects which are run with the purpose of innovation and development. It is worth noting the achievements of the Budapest LAB Entrepreneurship Centre, the Centre of Excellence of Sustainable Hospitality, the Future of Higher Education Research Centre, the Centre of Excellence for Cyber Economy, or the Oriental Business and Innovation Centre.

BUDAPEST UNIVERSITY OF TECHNOLOGY AND ECONOMICS

Budapest University of Technology and Economics (BME), Hungary's leading higher education institution in engineering, celebrated the 239th anniversary of its predecessor's foundation in 2021. In spite of having over 21,000 students, it provides not only education and training for large numbers but also offers unique, mostly master's programmes.

Currently we offer 25 bachelor's and 38 master's programmes in eight fields of study as well as 12 doctoral schools and several postgraduate specialization programmes in different languages, adjusted to the current educational needs.

As a research university, it focuses on the following research areas of prime importance:

- Nanotechnology and materials science
- Biotechnology for health and industry
- Artificial intelligence for industry and society – Smart techniques

- Artificial intelligence – Future mobility
- Water sciences and disaster prevention
- Efficient and intelligent manufacturing technologies

There are several research groups at the University receiving prominent support from the Hungarian Academy of Sciences (HAS).

Corvinus University of Budapest is an internationally recognized, prestigious, state-accredited Hungarian university with over 300 partner universities on five continents, and memberships in some of the most elite international networks (e.g. CEMS, PIM, AACSB, EFMD, EMPA). It is the only Hungarian university with EQUIS and AMBA accreditations, but it also owns other prominent accreditations and labels such as BSIS, EPAS, EAPAA, as well as CFA qualified finance programmes. The number of study programmes conducted entirely in English is continuously increasing.

Corvinus University, with approx. 12,000 students, offers educational programmes in three disciplines, Business and Management, Economics and Social Sciences at bachelor's, master's and PhD levels and it runs three MBA programmes in English as well. Business and Management is the main profile of the University and an exceedingly successful field of education. The University is located in Budapest,

the capital of Hungary, which serves as the main centre for Hungarian scientific and cultural life.

In terms of student and staff numbers, quality of tutoring and research, and international relations, Eötvös Loránd University (ELTE) is the most prestigious public HEI in Hungary operating since 1635.

Currently about 30,000 students study at 9 faculties and 1 institute with about 3,000 international students from over 100 countries.

Through its extensive, worldwide international relations, ELTE is the only HEI representing Hungarian higher education in many regions and in strategic alliances. These partnerships offer a large number of possibilities for mobility and international collaboration to students, academic staff and non-academic staff.

ELTE is a member of the CHARM (Challenge-driven, Accessible, Research-based, Mobile) European University alliance which is creating the full model of an innovative higher education institution, developing programmes for a new generation of experts of global social and environmental challenges.

ELTE is Hungary's largest scientific establishment with 16 doctoral schools and 128 doctoral programmes. Research at ELTE means an interdisciplinary approach, modern infrastructure, and innovation. Cutting-edge projects are funded by the EU and the Hungarian Academy of Sciences.

Our institution takes great pride in its past; it has served the Hungarian higher education for over 250 years. Today, it is a popular university well embedded in the scientific, cultural and economic life of the region. EKCÜ provides high quality education, excellent research opportunities and offers a friendly atmosphere for its roughly 6,000 students. The five Faculties of the University (Humanities, Economics and Social Sciences, Natural Sciences, Pedagogy, Informatics) are located on two campuses in beautiful historic towns situated in major wine regions of Hungary. The University has seen rapid development during the past years, and has launched English language undergraduate and graduate education courses and summer schools. Working alongside the faculties, there are ten internationally acclaimed knowledge centres that undertake applied research, as well as satisfying the practical needs of the region's institutions and companies. Additionally, EKCÜ runs primary and secondary schools, a hotel, a vineyard and a winery allowing students to develop their practical skills.

HUNGARIAN UNIVERSITY OF AGRICULTURE AND LIFE SCIENCES

Founded on the 1st of February 2021, the Hungarian University of Agriculture and Life Sciences (MATE) has become one of the largest and oldest agricultural-focused, multi-disciplinary tertiary education institutions in Europe, which came into being by the integration of the former Szent István University, Kaposvár University, Gyöngyös Campus of Eszterházy Károly University and Georgikon Faculty of University of Pannonia.

MATE consists of 5 campuses for study and research hosting nearly 12,000 domestic and 2,000 international students from 102 countries. With active partners on almost every continent (more than 250 partner institutions in 50 countries), MATE students and staff operate on a global scale to gain and share the essential knowledge for success in the globalized world. We see this as the cornerstone for a more secure tomorrow and are proud to be a vital part of it.

Our areas of specialization include:

- Teaching and research of food source production
- Food quality and safety
- Water and soil as strategic resource
- Environmental protection and sustainability
- Energy security
- Bio economy

Throughout its history, the Hungarian University of Fine Arts's mission and primary goals have remained the same: to preserve the living traditions of both Hungarian and European fine arts, while also creating new value through an openness to trends in contemporary art and reflection thereon. Since 1871 the University has provided education and training to the future actors of the cultural scene in all areas of the visual arts.

Practical studio training is conducted and personally instructed by the leading artists of the country. In addition to practical training, theoretical subjects make up a fundamental component of the education. Extending far beyond a general scope, a firm background in the specialized visual arts-related branches of history, theory, and sociology is of indispensable importance for the students.

The Library and Art Collection contains an excellent selection of art books and periodicals. In its various exhibition places, the University

puts work by students on display and also presents retrospective exhibitions and international group shows on a regular basis.

The University's central and historical building is located on Andrásy Avenue, the most elegant and iconic boulevard of Budapest. Only a few hundred metres from the main site, the University's Mulberry Garden facility, a former art colony, provides the ideal environment for the studios situated there, while the art camp located in Tihany is at the most beautiful point of Lake Balaton.

Taking into account its legal predecessors as well, Óbuda University is a 140-year-old institution. Today, it is a key player in Hungarian higher education and a leading practice-oriented institution providing technical education in Hungary, where more than 12,000 students pursue their studies. It offers competitive knowledge in the fields of engineering, informatics, science, economics, and teacher training in 7 faculties, 3 doctoral schools, and 2 education centres (17 undergraduate and 11 master's programmes). ÓÚ is an attractive, international place for study and research for many people. It has excellent conditions for world-class research and education, a multi-cultural flair in labs and lecture halls, and active promotion of international partnerships. With offering 7 BSc, 6 MSc and 3 PhD programmes and so-called Erasmus modules in English language, the University hosts more than 500 international students from more than 50 countries each year. ÓÚ leads and participates in the Horizon2020, the Erasmus+ KA2 projects, and also has an extensive international cooperation network in the KA1 programmes.

"We turn ideas into engineering. Our concentration is to maintain high-quality, student-focused higher education providing strength in research spanning a diverse set of intellectual disciplines and applications within the fields of engineering and economics."

250-year-old Semmelweis University, the oldest medical school in Hungary, is among the top 500 universities in the world, and is one of the leading universities in Europe in the field of medical and health sciences. The University offers practice-oriented education based on a strong theoretical foundation in three languages (English, German and Hungarian) and has various international campuses. Diplomas issued by Semmelweis University are recognized in the European Union and by many other countries worldwide. University students come from over 70 different countries, and one-third of nearly 11,000 students are international.

Semmelweis University is also Hungary's largest healthcare provider: its hospitals and clinics offer high-quality patient care services, providing ample opportunities for practical education as well.

Semmelweis University is a regional centre of excellence for research & innovation in the field of life sciences and is home to numerous innovations contributing to the progress of health sciences.

Semmelweis University's School of PhD Studies is a leading institution of PhD training in Hungary, dedicated to the development of science through more than 40 programmes in Hungarian and English.

Semmelweis University considers international relations a top priority. It is a member of several international professional and scientific organizations, maintains active co-operation with a high number of higher education institutions worldwide, and strives to continuously develop its international relations in the fields of education, research & innovation, and healthcare.

Széchenyi István University is located in Győr, an attractive city on the River Danube in north-west Hungary, and situated mid-way between the capitals of Hungary, Austria and Slovakia. Due to its optimum location, Győr has become a leading automotive and industrial centre and the base of the world's largest engine factory: Audi Hungaria Motor Kft. – the University's most important partner in industrial collaboration.

As a prime provider of quality education, SZE offers 35 English-taught degree programmes at bachelor's, master's and doctoral levels in several fields of engineering (especially automotive), IT, architecture, pedagogy, economics, international relations, law, business administration, sport and health, music performance, agriculture, tourism, international relations, management and marketing. With laboratories equipped to world-class standards, the University offers excellent capacities to pursue research.

As a reflection of the University's reputation for quality education, many multinationals hire our graduates. With 45 years' tradition and experience supporting Hungary's leading industries, this institution has become the primary driver of the local economy.

Tomori Pál College, founded in 2004, is a Hungarian higher educational institution recognized by the state. Most of our teaching activities are concentrated in Budapest but we also have affiliates in other Hungarian cities (in Kecskemét and Kalocsa).

Our institution works in a family-like and student-oriented atmosphere. Our leaders and colleagues are committed to providing quality teaching and research facilities to our students and cooperative partners.

We would like to share our knowledge and free research capacities with our potential partners in the following fields:

- SME development (management, networking, competitiveness, finance, accounting, etc.)
- Educational development (new methods, gamification, generations, etc.)

- EU highlighted topics (migration, security, BREXIT, Central-East-Europe, etc.)
- Regional and local development (innovation, tourism, competitiveness, city marketing, etc.)
- Creative and cultural industry (trends, companies in CCI, etc.)

Tomori Pál College's Research Centre is responsible for the coordination of research activity in the institution.

With its 8 campuses, 363 buildings, 28,500 students, 8,740 full-time employees and 17.7 million medical procedures per year, the University of Debrecen tops national statistics. The University of Debrecen has the second largest student body in the nation in total and the highest number and proportion of international students (6,500 and 22%, respectively).

With a variety of training programmes ranging from medicine through engineering to music, UD has a wide selection of undergraduate, graduate and PhD courses in English.

Due to its broad range of international connections, the University of Debrecen has signed cooperation agreements with several hundred partner institutions including universities in Europe, Asia, and the American continent. UD collaborates with 25 higher education institutions around the world within the framework of the Erasmus+ International Credit Mobility Programme.

UD is placed 521-530 in the QS World University Rankings and ranked 151-200 on the Europe Teaching Rankings list of Times Higher Education focusing on educational excellence.

Our university of applied sciences is located in Dunaújváros, in the central region of Hungary on the banks of the river Danube, 70 km to the South of Budapest.

15% of our students are international students who come from more than 30 different countries. We actively participate in the Erasmus+ KA103 and KA107 projects as well as the Stipendium Hungaricum scholarship programme.

There are more than 50 laboratories at the campus of our university, many of which are devoted to the practical classes of our students. A few of our laboratories are involved in research and development projects in cooperation with the industrial companies of our region. We are interested in promoting cooperation in education and research in the academic areas of IT safety and data protection, non-destructive material testing, mechanical material

testing on metals and polymers, the physical simulation of forging as well as hot and cold rolling.

A unique, spacious campus, home to more than 10,000 Hungarian and international students, as well as 600 lecturers and researchers, in a beautiful, natural, green environment, with up-to-date laboratories, lecture halls, workshops, student hostels and facilities for sports, culture and entertainment – this is the University of Miskolc.

The combination of tradition (it was founded in 1735) with novel directions in research and education has resulted in a large number of professional awards, educational and research projects and patents, as well as in the increasing interest of international students who wish to pursue studies at the highest academic level.

The University of Miskolc has gained expertise in implementing several educational and scholarship projects, including many Erasmus projects, both inside and outside the European Union. It has more than 90 active cooperation agreements with academic partners all over the world. Furthermore, it is actively involved in

numerous research projects such as Horizon 2020, cooperating with international industrial and academic partners.

The faculties, doctoral schools and research institutes of the University of Miskolc all welcome both educational and research cooperation initiatives coming from international partners to boost innovation, enhance scientific inspiration, and provide its academic staff and students with an innovative, fresh academic atmosphere.

The University of Pannonia is a public university with 5 faculties located near Lake Balaton in Hungary. Veszprém, where the main campus is seated, won the European Capital of Culture for 2023 programme. In order to help in realizing the vision of the programme, the University is an active strategic partner promoting cultural diversity, innovation and sustainable development. Campuses can be also found in Kőszeg, Nagykanizsa and Zalaegerszeg.

For the purpose of meeting the needs of the labour market, our activities are carried out in close cooperation with the region's leading industrial partners and local governments. The University's cutting-edge multidisciplinary research centre facilitates several R&D projects, providing excellent research opportunities to bring impactful changes to the region and beyond.

The University is considered to be the heart of the Central-Transdanubian region due to its commitment to broaden and promote

high-quality education. In order to build diverse, inclusive and multi-cultural campus environments, the University maintains close relationships with several international higher education institutions through joint research projects and exchange programmes.

With its 20,000 students and 500 different study programmes, the University of Pécs (UP), the oldest university in Hungary, is one of the largest institutions of higher education in the country.

The UP functions as a knowledge centre for innovation in the South Transdanubian Region. Nearly 2,000 teaching and research staff members participate in research projects at our 10 faculties. The research groups having state-of-the-art technology and high quality scientific knowledge give a clear basis to make the university the leading research institute in Hungary and Central Europe.

The University has conducted degree programmes in English for more than 30 years and so has become one of the most internationalized universities in Hungary. We are proud to host over 4,500 international students coming from more than 114 countries of the world.

UP has earned a prominent position in terms of international excellence as well. The entire institution as a whole, as well as many

of our faculties and study programmes took leading positions in highly recognized international rankings.

The University of Physical Education (TE) and its institutional predecessor is one of the oldest higher educational institutions in Europe in the field of body culture, including sports and education. TE combines its traditions and culture to match the new challenges of a knowledge-based society, while taking into consideration various socio-economic demands.

TE preserves its traditions and permanently develops in harmony with what the given period requires. This is why in its educational strategy, theoretical and practical knowledge complement each other. In order to ensure competitive knowledge for the students in each field of study, the amount of sport training has increased. While developing its educational content, the institution became aware of the practice-based demands formulated by the representatives of sport federations and educational institutes, some of the future utilizers of knowledge. As a result, the training programmes have been harmonized with labour market expectations.

The mission of the University is to train specialists who, as future intellectuals, possess a high level of theoretical and practical knowledge applicable in the various fields within sports.

The University of Szeged (SZTE) has 12 faculties and 16 research groups supported by the Hungarian Academy of Sciences.

It is one of the largest universities in Hungary, with its history dating back to 1581 and with more than 21,000 students. The University maintains fruitful cooperation with more than 100 highly-ranked universities in the world and has signed 1078 ERASMUS+ bilateral agreements with 539 partner universities in 31 countries. According to the QS World University Rankings it is the best Hungarian University in 2021 and it is among the best universities of the world in the Times Higher Education Impact Rankings.

The 2,500 instructors and researchers at the University of Szeged are actively involved in national and international research projects. We have 19 Doctoral Schools and a 32 internationally renowned research teams, out of which 18 research groups are supported by the Hungarian Academy of Sciences (MTA).

Since 2020 SZTE is member of EUGLOH, an alliance of 5 universities

sharing the ambition of combining their expertise and resources in Global Health to offer the best education and training to their students. They aspire to become a world-class higher education alliance.

The Hungarian Rectors' Conference (HRC), as the unique representative body of local universities, is proud to be one of the oldest and most prestigious organizations in Hungary responsible for the university sector, academic cooperation and internationalization of higher education.

HRC operates with a young and enthusiastic team, with strong engagement towards development, focusing on innovative solutions and keen to achieve outstanding success together with its partners in the realization of joint higher education projects.

HRC promotes Hungarian higher education worldwide, organizes roundtables, conferences and workshops, manages incoming and outgoing delegations' visits, and coordinates short-term study (e.g.: summer university) and scholarship programmes. HRC enhances collaboration with international partner organizations and promotes bilateral cooperation between Hungarian and international

higher education institutions, whilst also participating in European Union policy-making and EU funded projects.

HRC is in active cooperation with universities, ministries, embassies (both in and out of Hungary), public foundations, national agencies, and the press.

POSSIBLE FORMS OF COOPERATION

- Organization of rectors' forums, roundtables, conferences and workshops
- Professional and logistical management of international delegations' visit to Hungary
- Coordination of summer programmes, scholarship programmes, short-term study programmes
- Collaboration in EU-funded and other international projects

TEMPUS PUBLIC FOUNDATION (TPF) *Who we are and what we do*

- A non-profit organization established in 1996 by the Hungarian Government.
- National coordinator of international cooperation programmes and special projects in the field of education, training, youth and EU-related issues in Hungary:
 - Stipendium Hungaricum Scholarship Programme
 - Erasmus+ Programme
 - Campus Mundi Programme
 - Central European Programme for University Studies (CEEPUS)
 - Bilateral State Scholarships
 - National Information Point for Europe for Citizens programme
 - National Europass Centre
 - Alumni Hungary Network

➤ TPF has also been managing the Study in Hungary initiative since 2013.

- As a knowledge centre, TPF offers project management and skills development training tailored to the learners' specific needs.
- TPF aims at
 - encouraging international cooperation and mobility
 - modernizing and improving the quality of education, training, and human resources development
 - strengthening the European dimensions in these fields
