

## Webinar

### EFFeCT – European Methodological Framework for facilitating Teachers' Collaborative Learning

April 25th 2018 (15:00 CET)

The main focus of the 2,5-year-long EFFeCT project was to improve teacher competencies through enhanced opportunities for **teachers' collaborative learning** (CTL) by promoting networking and professional collaboration between teachers and other educational stakeholders (teacher trainers, school leaders, educational decision-makers and developers etc.).

Our webinar will focus on the results of the EFFeCT project by presenting the Methodological Framework of CTL and the online Resource Pool which will help the above mentioned stakeholders in the planning and the implementation of professional development processes.

Participants will also have the possibility to get an insight into EFFeCT webpage, where beyond the publishing of the research results, a structured Guidelines of CTL for facilitators, a CTL-Glossary and a CTL-Library has also been developed for giving guidance to the audience.

*This webinar will be delivered in English.*

#### Agenda:

15.00-15.05	Opening of the webinar - <i>Mika Risku</i> (Moderator)
15.05-15.10	Introduction of the project – <i>Katalin Albrecht Garai</i>
